PUBLIC CYBER ATTACK MISSIONS for individuals in an open class					
<p>Be immersed in a live cyber attack playing out on a virtual cyber range! Participate from anywhere in a half-day, live, Cyber Attack Mission and put your detection, investigation, or remediation skills to the test. This mission will feature a cyber attack of your choice happening before your eyes in a live network. Prices are per person.</p>					
<p>Attack Type: Java Send Mail</p>	<p>Half day</p>	<p>Remote: Virtual live Instructor-led via browser</p> <p>Similar to Java NMS Kill, this scenario emulates a Watering-Hole attack in which the attacker sits and waits for the victim. The victim, having performed the expected action of navigating to a known, infected website enables the hacker to "eavesdrop" on all messages within the organization through the execution of a Trojan Horse. Participants will leverage their advanced analysis techniques in this complex attack to detect, analyze and stop the malicious code to minimize the attack surface and protect the organization from further compromise.</p>	<p>Advanced</p>	<ul style="list-style-type: none"> - Linux log management - Checkpoint firewall - HTML/Java knowledge - ArcSight - Linux forensics 	<p>Individual SOC analysts, managers, and engineers looking to put their detection, investigation, or remediation skills to the test in a single mission.</p>
