PUBLIC CYBER ATTACK MISSIONS for individuals in an open class		**Scenario Description / Course Outline**			
Be immersed in a live cyber attack playing out on a virtual cyber range! Participate from anywhere in a half-day, live, Cyber Attack Mission and put your detection, investigation, or remediation skills to the test. This mission will feature a cyber attack of your choice happening before your eyes in a live network. Prices are per person.					Individual SOC analysts, managers, and engineers looking to put their detection, investigation, or remediation skills to the test in a single mission.
Attack Type: WPAD Man in the Middle	Half day	Remote: Virtual live Instructor-led via broswer	In this scenario, a Man-in-the-Middle (MiTM) attack is executed on the network where the attacker impersonates a legitimate proxy in the segment in order to deceive victim hosts. In this complex scenario, participants will use advanced detection and prevention techniques to mitigate the scenario before significant data is exfiltrated from the environment, leaving the organization in a more vulnerable position.	Advanced	- Windows forensics - Checkpoint firewall - Network forensics - DNS, ICMP protocols - Packet sniffers
